

Dangers to Your Health

POLLUTION

Importance of conservation

	Conservation of soil: Crop rotation, adding manure Conservation of ground water: Rain harvesting, afforestation Conservation of forests: Plant trees, preserve existing forests Conservation of wildlife: National parks, wildlife sanctuaries, severe punishment for poaching Conservation of energy: Avoid wastage of energy, use alternative sources
---	--

How can we contribute?

 avoid plastic	 Fix leaking taps	 Use car pool	 turn off lights when not in use
 recycle wastes	 Plant more trees	 use energy efficient bulbs	 Use public transport
 Walk more	 Compost wastes	 use a cycle when possible	REDUCE REUSE RECYCLE
