नया आगाज़

आज समय की माँग पर
आगाज़ नया इक होगा
निरंतर योग्यता के निर्णय से
परिणाम आकलन होगा।

परिवर्तन नियम जीवन का
नियम अब नया बनेगा
अब परिणामों के भय से
नहीं बालक कोई डरेगा

निरंतर योग्यता के निर्णय से
परिणाम आकलन होगा।

बदले शिक्षा का स्वरूप
नई खिले आशा की धूप
अब किसी कोमल-से मन पर
कोई बोझ न होगा

निरंतर योग्यता के निर्णय से
परिणाम आकलन होगा।
नई राह पर चलकर मंज़िल को हमें पाना है
इस नए प्रयास को हमने सफल बनाना है
बेहतर शिक्षा से बदले देश, ऐसे इसे अपनाए
शिक्षक, शिक्षा और शिक्षित
बस आगे बढ़ते जाएँ
बस आगे बढ़ते जाएँ
बस आगे बढ़ते जाएँ.....

Preface

With the ever changing world, the Transport Systems & Logistics Management industry has transformed from conventional transportation concept to as efficient managers using advanced technologies that can enhance the safety, security, sustainability and efficiency of their operations. The Transport Systems & Logistics Management in India has been receiving greater attention in the last few years with sustained growth of India's GDP.

Indian logistics industry is expected to grow at 15 to 20% per annum, reaching revenues of \$385 billion by 2015. Demand for focused supply chain services have been fueled by industries with a high propensity to outsource: automobiles, consumer packaged goods, hi tech, telecom and retail amongst others. Movement of basic commodities for both domestic consumption and export/import has led to increase in multi modal and bulk transportation and proliferation of ports and related services.

To address the problem of unskilled manpower across various industrial sectors, CBSE has undertaken the ambitious project of introducing competency based Vocational Education in its affiliated schools. Taking cue from this need, a new course on Transport Systems & Logistics Management is being launched that will help students to join the industry after Class XII or they can pursue higher education in this field.

The Board is grateful to the members of the Committee of Course for their advice, guidance and total commitment towards development of this course. We are indeed indebted to these academic advisors who have lent us the benefit of their rich and insightful experience. I would like to appreciate Vocational Education Cell, CBSE; for coordinating and successfully completing the work.

GENERAL INSTRUCTIONS TO THE STUDENTS

1. As the paper Logistics, Operations and Supply Chain Management – I provides the basic introductory information, the students should understand the concepts clearly, failing which, it would be difficult to follow the paper of Logistics, Operations and Supply Chain Management – II.
2. The students are expected to keep in mind the concepts discussed in Unit – I of this paper, while studying the Unit – II of Logistics, Operations and Supply Chain Management – II. Further, Unit – III of this paper forms basis for better understanding of Unit – III of Logistics, operations and supply chain management – II.
3. The students are expected to attend the field visits to different types of warehouses as explained so as to understand practically the fine distinctions. Further, the students are advised to visit different transport offices, so as to understand the concepts of freight movement, freight costs, network planning, vehicle scheduling. Moreover, students are advised to visit various firms/companies and understand about pragmatic approach to inventory management and supply chain management aspects.
4. Before proceeding to field visits, each student is advised to go through the relevant concepts discussed in the Guide Book, so that it would be easy to grasp the ongoing practical aspects. While, practically observing the day to day operations relating to transport, warehousing, inventory and supply chain management issues, the students are advised to interact with the concerned officials/executives relating to working of the system.
5. During the field visits, each student is advised to note down the important points of observation and discussion, so that the same can be shared in the classroom for better exposure and common benefit.

MODULE OBJECTIVES

LOGISTICS, OPERATIONS AND SUPPLY CHAIN MANAGEMENT - I

S. No.	Unit/Chapter Name	Theory	Key Learning Objectives
1	Elements of Logistics, Operations and Supply Chain Management	20 hrs	● Concept and evolution of logistics, logistics functions ● Distinction between IBL and OBL ● Concept of warehouse and distinction between types and functions ● Concept of inventory management ● Supply chain management concept ● Refrigerator and cold chain container movement
2	Multimodal modal Transport System	20 hrs	● Meaning of multimodal transport system ● Features and advantages of multimodal transport system ● Distinction between various types of intermodal movements and intermodal relationships ● About multimodal carriers ● Importance of international movements
3	Freight Management and Material Handling	30 hrs	● Concept of network planning, route management and vehicle scheduling ● About hub and spoke model ● Distinction between fixed costs and variable costs and costs involved in various means of transportation. ● Usages of storage facility and functions of storage ● Safety methods to be followed while storing goods ● Staking of goods and distinction between unloading and handling of goods

4	Safety in Transportation & Traffic Regulation	30 hrs	● Importance of safety in transportation ● Factors responsible for air accidents ● Equipment used in navigation & their significance, various landing categories ● Classification of railway accidents, causes of accidents and reasons for derailments ● Safety measures to be adopted & method of accident management ● Causes of road accidents and steps to be taken in case of accidents ● Safe shifting and storage of Cargo ● Four phases of disaster management ● Accident Management, traffic management and regulation
5	ISO in Logistics and Occupational Hazards	30 hrs	● Concept of ISO in logistics ● Nature, formulation and quality control cycle. ● Meaning of green logistics and paradoxical aspects green logistics. ● Government intervention and legislation and other aspects to improve environment. ● Various health hazards and safety measures to be taken
